Amendments to the Claims

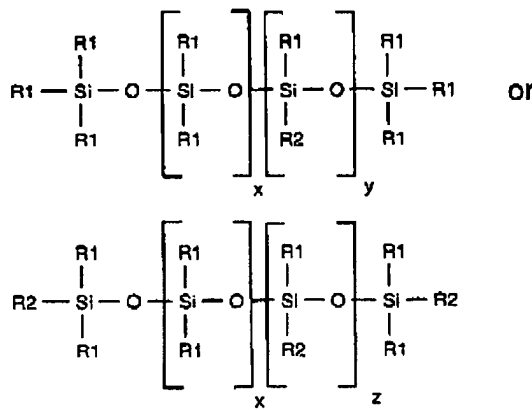

1. (canceled)

2. (canceled)

3. (currently amended) A process for making a vesicle composition comprising;

I) combining,

A) 2 to 25 wt % of a silicone polyether copolymer of claim 1 having a structure represented by:

where R1 represents an alkyl group containing 1-6 carbon atoms;

R2 represents the group $-(\text{CH}_2)_a\text{O}(\text{C}_2\text{H}_4\text{O})_b(\text{C}_3\text{H}_6\text{O})_c\text{R}_3$;

x is 251-1,000; y is 1-500; z is 1-500; a is 3-6; b is 4-20; c is 0-5;

and R3 is hydrogen, a methyl group, or an acyl group.

B) 2 to 30 wt % of an optional water miscible volatile solvent,

C) water in a sufficient amount to provide the sum of the wt% of A), B), and

C) to equal 100%,

to form an aqueous dispersion of the silicone polyether copolymer,

II) mixing the aqueous dispersion to form a vesicle composition having an average particle size of less than 0.500 micrometers,

III) optionally, removing the water miscible volatile solvent from the vesicle composition.

4. (Original) The vesicle composition produced by the process of claim 3.

5. *(canceled)*

6. *(canceled)*

7. *(previously presented)* The vesicle composition of claim 4 further comprising a personal, household, or healthcare active ingredient.

8. *(previously presented)* A personal, household, and healthcare composition comprising the vesicle composition of claim 5.

9. *(previously presented)* A personal, household, and healthcare composition comprising the vesicle composition of claim 7.
